• Typically a role supported by close supervision. • Job holders work within a highly structured environment performing basic, routine practical or administrative tasks. • Work is clearly defined with detailed instructions and immediate guidance with established procedures. • Limited responsibility for outcomes with regular checking of work. • Problems and queries are referred to supervisors or more experienced colleagues.	• Typically a role supported with regular supervision. • Job holders at this level undertake routine practical tasks with some independence. • Job holders will resolve simple problems independently and refer more complex issues to supervisors. • Job holders will manage their own day to day work with guidance.	• Typically a role that achieved formal qualifications or relevant work experience or has received specialised training for the role • Job holders at this level typically work independently with regular reviews	within prescribed parameters and may advise others within their own area of expertise. • Job holders will resolve common problems independently and refer more complex issues to supervisors. • Job holders will perform tasks that include basic analysis and problem solving within a larger project or team output. • Work is defined with procedures and methods, but requires some interpretation.	• Typically achieved formal qualifications or relevant work experience or has received specialised training for the role with periodic reviews • Job holders at this level mainly work independently with minimal work direction and may advise others within their own area of expertise. • Job holders are developing as a subject matter specialist in a defined area, applying, troubleshooting and solving moderately complex problems. • Job holders may supervise small teams or coordinate work packages. • Work is defined with procedures and methods, but requires some interpretation.	• Achieved formal qualifications or relevant substantial work experience or has received specialised training for the role with periodic reviews • Job holders at this level mainly work independently and often advise others within their own area of expertise. May mentor less experienced team members. • Job holders are recognised subject matter specialists in a defined area, applying, troubleshooting and solving moderately complex problems. May deliver specialist training. • Job holders are expected to proactively identify opportunities for the application of their skills and knowledge and suggest improvements. • Job holders will begin to take responsibility for discrete areas of work within larger work packages. May review and approve technical documents against project requirements. • Work is defined within procedures and methods, but requires some interpretation within the implementation.	• Achieved formal qualifications and relevant extensive work experience or has received specialised training for the role through relevant extensive work experience typically with a professional accreditation • Job holders at this level work independently and may advise others within their discipline. May mentor less experienced team members. • Job holders at this level may be in a leadership role which may encompass technical, project, or people leadership. • Job holders at this level will likely assign, coordinate, and conduct reviews for their team. • Job holders are recognised subject matter specialists or subject matter experts in a defined area, analysing, troubleshooting and solving complex problems. May deliver specialist training. • Job holders are expected to proactively identify opportunities for the application of their skills and knowledge and suggest improvements. • Job holders will lead technically substantial and may have wider organisational impact. Work is typically not defined by procedures, but rather objectives.	• Achieved formal qualifications and relevant extensive work experience or has received specialised training for the role through relevant extensive work experience typically with a professional accreditation • Job holders at this level work independently and coordinate others across multiple disciplines for a complex project. Expected to mentor less experienced team members. • Job holders at this level will likely assign, coordinate, and conduct reviews for their team. • Job holders are subject matter experts in a defined area, analysing, troubleshooting and solving complex problems. • Job holders are expected to proactively identify opportunities for the application of their skills and knowledge and suggest improvements. • Job holders at this level plan, coordinate and deliver significant packages of work within major and complex projects. They may coordinate work both internally within the team and externally across different teams. • Job holders at this level may be expected to provide technical strategic leadership within their area of expertise. • Work that is led is typically substantial and may have wider organisational impact over longer time scales. Work is typically not defined by procedures, but rather objectives.	• Achieved formal qualifications and relevant extensive work experience or has received specialised training for the role through relevant extensive work experience typically with a professional accreditation • Job holders at this level work independently and coordinate others across multiple disciplines for a complex project. Expected to mentor less experienced team members. • Job holders at this level will likely assign, coordinate, and conduct reviews for their team. • Job holders are subject matter experts in a defined area, analysing, troubleshooting and solving complex problems. • Job holders are expected to proactively identify opportunities for the application of their skills and knowledge and suggest improvements. • Job holders at this level plan, coordinate and deliver significant packages of work within major and complex projects. They may coordinate work both internally within the team and externally across different teams. • Job holders at this level may be expected to provide technical strategic leadership within their area of expertise. • Work that is led is typically substantial and may have wider organisational impact over longer time scales. Work is typically not defined by procedures, but rather objectives.	• Job holders are assessed professionals who have achieved formal qualifications and relevant deep, broad, and comprehensive work experience or equivalent. • Job holders at this level are expected to be in a leadership role which may encompass technical, project, or people leadership. May lead large and multi-disciplinary teams. This will influence organisational direction as well as national or international collaborative projects. • Job holders are expected to have the authority to be the final sign off on complex projects. • Job holders are recognised subject matter experts in the industry. This may be nationally and internationally and may be invited to represent the organisation at a national or international level in their area of expertise. • Job holders at this level will provide technical strategic leadership within their area of expertise. • Work that is led will be substantial over longer time scales and with wide organisational impact. The work is not clearly defined and policies are formulated within broad functional guidelines. Work is typically critical in nature, where there is typically little or no precedent to the solution. Working to the overall objectives or function of the organisation.	• Job holders are assessed professionals who have achieved formal qualifications and relevant deep, broad, and comprehensive work experience or equivalent. • Job holders at this level are expected to be in a leadership role which may encompass technical, project, or people leadership. May lead large and multi-disciplinary teams.
